Dear Dr Kemp,

Thank you for taking part in the briefing on 31 August for MOA members on recent events regarding RMIT University in Australia and the extensive media publicity surrounding mobile phone base stations on its rooftop.

You were able to provide MOA members with a firsthand and highly informed insight into effective crisis management to address public and media concerns around the perceived health risks of mobile phone base stations. You were also able to share with us recent leading edge experience on this issue from the Australian mobile telecommunications sector. This informed our thinking on the issue and has been of considerable benefit to the MOA and its members.

We were grateful for your expert input and look forward to working with you in the future.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Mike Dolan', with a stylized flourish at the end.

Michael Dolan,
Executive Director
